Night Light

Cooking in the dark can be risky—if you can't see clearly, your medium-rare steak can become very expensive shoe leather. Attach this small magnetic LED light to almost any metal spatula and swivel the head to aim the light exactly where you need it. Outset Magnetic Light For BBQ Tools, \$15; cheftools.com

SHADY SHOWOFF

Fall is a great time to plant perennials, and this is one of our favorites for shade gardens. 'Color Flash' astilbe sprouts bright chartreuse leaves in spring, then matures to shades of burgundy, green, and purple. In fall, it blazes with gold and russet foliage. Find a retailer at monrovia.com.
